## Summary

JavaScript developer with experience in the MERN stack and some familiarity with AngularJS. Skilled in building dynamic and responsive web applications, with a strong focus on user experience. Passionate about learning new technologies and improving development skills. Eager to contribute and grow in a collaborative environment.

## Education

### NCBA&E DHA Campus

*Bachelor of Science in Computer Science*

Oct. 2022 – Continue

Lahore, Pakistan

## Experience

### Freelance Web Developer

Feb 2024 – May 2024

- Created highly responsive and scalable web applications for use in different industries.
- Ensured cross-browser compatibility of websites on various platforms.
- Developed websites with accessibility and compatibility for different browsers.
- Completed new development work and updates using multiple programming languages.
- Met application goals with expert use of optimal development tools and frameworks.
- Designed database structures for web applications using SQL or NoSQL databases.

### Bricks Project - Property Management System

Dec 2024 – Feb 2025

- Designed and developed a modern, responsive UI using Tailwind CSS and custom CSS.
- Optimized AngularJS frontend components for better performance and interactivity.
- Ensured cross-browser compatibility and a seamless user experience.
- Debugged complex CSS responsiveness issues across different screen sizes.
- Gained experience in refactoring AngularJS components to improve maintainability.
- Implemented custom animations and transitions for enhanced user engagement

## Projects

### INOTES APP:

**Description:** Developed **iNotes**, a full-stack MERN app for secure and organized note-taking. Implemented user authentication with protected routes for personalized dashboards. Enabled features like add, edit, pin, delete, and search with smooth UI animations. Styled with TailwindCSS, animated with Framer Motion, and deployed on Vercel.

- **GitHub Repository:** <https://github.com/asjad491/inotes/>

### MOVIE MAZE APP:

**Description:** Built a responsive Movie Search App Using React and Tailwind CSS. Integrated a third-party API to fetch and display movie/show data with filters for genre and year. Implemented dynamic search with graceful handling of missing or sparse data. Deployed on Vercel with GitHub-linked source code for easy access.

- **GitHub Repository:** <https://github.com/asjad491/Movies-search-application>

---

#### EXPENCE TRACKER:

**Description:** Developed a full-stack web application using React.js for front-end development, allowing users to efficiently track their expenses. Utilized modern web technologies such as React Hooks for state management and responsive design principles to ensure optimal user experience across devices. Implemented functionality for adding, editing, and deleting expenses.
